VELLO DI PURA LANA PETTINATA

Questo telo in pura lana pettinata con trattamento superwash, grazie agli spazi d'aria dovuti alla finezza delle sue fibre, favorisce la circolazione sanguigna dei punti del corpo che ne vengono a contatto, agendo come "ammortizzatori". Il potere isolante e termoregolatore naturale della pura lana consente di mantenere costante la temperatura corporea. Le sue caratteristiche lo rendono un prodotto consigliato come ausilio nei casi di dolori reumatici, muscolari, artrosici, tendinei e anche nella prevenzione delle piaghe da decubito. La lana di pecora è, inoltre, una materia prima rinnovabile: il prodotto che utilizzerai è quindi ecologico e non provoca l'esaurimento di alcuna risorsa.

Un consiglio: La lana di pecora ha un forte potere autopulente che si attiva soprattutto durante l'esposizione all'aria umida. Non è perciò necessario un lavaggio frequente.

Istruzioni per il lavaggio:

- **Lavaggio a mano:** Sciogliere bene una modesta quantità di detersivo di qualità in una bacinella precedentemente riempita con acqua tiepida (max 30°C). Utilizzare un detersivo specifico per la lana, neutro, con lanolina, restitutivo e biodegradabile. Frizionare delicatamente il prodotto per rimuovere lo sporco. Non strizzare. Far sgocciolare e sciacquare con acqua tiepida. Centrifugare brevemente a basso numero di giri.

- **Lavaggio in lavatrice:** Utilizzare preferibilmente un detersivo specifico per la lana neutro, con lanolina, restitutivo e biodegradabile. Lavare con programma lana a max. 30° C.

Istruzioni per l'asciugatura:

Se possibile, evitare di far asciugare il prodotto al sole o attraverso essiccatori o asciugatrici. Possibilmente far asciugare il prodotto steso orizzontalmente e non appeso, così da evitare una sua deformazione.

PURE WORSTED WOOL FLEECE

This pure worsted wool fleece with superwash treatment, thanks to air-cushions created by the fineness of its fibers, improves blood circulation of the body areas in contact with it, acting as a "shock absorber." The natural insulating and temperature control power of pure wool keeps your pet's body temperature constant. The features of this product are recommended in case of rheumatic pain, muscle, arthritis, tendon and also to prevent bedsores. Furthermore, sheep wool is a renewable material: the product you are using is therefore eco-friendly and does not cause the depletion of any resource.

Please note: Sheep wool has a strong self-cleaning power that is activated especially during exposure to wet air. Therefore, frequent washing is not necessary.

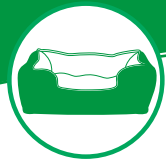

Washing instructions:

- **Hand wash:** Mix a small amount of high-quality detergent with lukewarm water (max 30°C) in basin. Use a specific, neutral, repairing and biodegradable detergent for wool with lanolin. Gently rub the product to remove dirt. Do not wring. Let it dry off and rinse it with lukewarm water. Run the spin cycle at low speed.

- **Machine wash:** Use a specific, neutral, repairing and biodegradable detergent for wool with lanolin. Machine wash on gentle cycle at 30°C max.

Drying instructions: If possible, do not let the product dry in the sun and do not tumble dry. Possibly do not hang the product, but lay it flat to dry so as to avoid deformation.
